

## **MANUAL CALL POINT**

**(ABS Body)**

### **Product Overview ....**

Conventional manual call point is an emergency alerting device which can be activated by pressing a transparent plastic window on its front side.

The call point once activated can be reset by press.

Designed for use with conventional fire alarm control panels and alarm loop by installing the module conventional zone module.

This allows the fire alarm control panel to monitor the conventional call point devices.

**AGNI-302**

### **TECHNICAL DATA SHEET**

| <b>PARAMETER</b>               | <b>DATA</b>          |
|--------------------------------|----------------------|
| 1. Make                        | Agni                 |
| 2. Model                       | AGNI-302             |
| 3. Maximum Voltage             | 30VDC                |
| 4. Operating Temperature Range | -10°C to +55°C       |
| 5. Body Colour                 | Red                  |
| 6. Maximum Wire Gauge          | 2.5 mm <sup>2</sup>  |
| 7. Ingress Protection Rating   | Ip23                 |
| 9. Size                        | L100 x H85 x D48mm   |
| 10. Humidity (Non Condensing)  | 0-95% non-condensing |
| 11. Weight                     | 160gms               |
